

**Contents:**

1. Gripper on a quick hitch.
2. Concreteclips (drill 12 mm).
3. Wire 4000 x 1,2 mm.
4. Tray for hard ceiling.

**Wiresolutionskit. Max 15 kg**

**Contains 10 kit.**

A complete wirehanger solution for all kinds of ceiling.

1. Hanging from sheet metall, plaster, wood and other sheet material. Drill a 5 mm hole and pull the wire throw the tray. Then after, push throw the hole in the ceiling.
1. Hanging from concrete. Normal is 12mm hole whit a deep around 30 mm, but make a test hole first. It may vary depending ski concrete quality. Look up the concrete clips whit a hammer. Pull the wire throw the tray and then throw the outsticking clips, then back throw the tray.
2. Hanging around ventilation tubes or similar. Pull the wire throw the tray then around the tube and back throw the tray.
3. The gripper is very fast to adjust, the wire go throw the gripper (please see the willow). To adjust the hanging up, just pull the wire downwardly. Don't pull the wire up. For hanging down, push the peg down and adjust. The grippers sit on a quick hitch (SKB 12) for the busbar and give a faster & simplar installation.
