MOLTO LUCE®

GOOD LIGHT STORIES

Euroshop 2026

MOLTO LUCE®

Our Expertise: Planning, development, implementation.

-  **In-house development & production in Austria:** Premium luminaires that impress with functionality, energy efficiency, durability, and design.
-  **Expertise & service:** Your requirements are implemented reliably and precisely – thanks to solution-oriented consulting and lighting design.
-  **Resource & cost efficiency:** Innovative solutions and efficient technologies enable significant savings in energy, costs, and CO₂e emissions.
-  **Tailored planning & flexibility:** Comprehensive support for architects, designers, and clients – from concept development to commissioning.

Under the motto “From our home to the world”, we are firmly committed to our location in Austria. From here, we realise impressive large-scale projects as well as refined, bespoke lighting and acoustic solutions.

Our dynamic development team and the continuously expanding production site in Weißkirchen near Wels ensure technological excellence, top product quality, and sophisticated design.

Combined with in-depth lighting and acoustic planning, this creates an unbeatable package of services – for new builds as well as refurbishments.

LIGHTS ON.

PEOPLE.

Around 470 employees at 10 locations in Austria, Germany, Switzerland and Italy are working to realise lighting solutions at an international level. We are an employer and training provider for a wide range of professions – from technicians and planners to sales specialists and back-office staff. Our strength lies in the knowledge and dedication of our employees. We are committed to securing and nurturing this expertise in the long term, which is why we invest specifically in training and development.

We are looking for individuals who are passionate about light, architecture and design, who are creative, reliable and committed, and who value respectful teamwork.

People. Power. Planet.

Sustainability means responsibility – towards people, the environment and the economy. With our People. Power. Planet. programme, we translate ESG principles into concrete goals and actions.

Three pillars for a shared future:

- People: fair working conditions, support for young talent, education and training
- Power: economic strength and innovative capability as the foundation of sustainable action
- Planet: conscious use of resources, resource-efficient production and energy-efficient products

These pillars are interlinked. Through continuous monitoring and our scorecard, we make progress measurable and document it transparently in our sustainability report.

WE CARE.

Technology in harmony with the environment.

Awards & Standards:

- EcoVadis Gold – among the top 5% of companies assessed worldwide
- Member of the UN Global Compact – commitment to international standards in environmental and corporate governance
- German Ecodesign Award – for the resource-saving X-Change technology

Innovative X-CHANGE technology
Converter, LED chip and optics can be replaced without tools – extending product lifetime and protecting the environment.

Our projects prove: successful lighting concepts know no boundaries. We think outside the box, we think in new ways – and we are fully committed to individuality rather than standard solutions. Only tailor-made concepts truly resonate with people on an emotional level while also meeting functional requirements. This is how light inspires – through emotion and efficiency – our customers, and ourselves.

PROJECTS.

Whether shop & retail, hotel & restaurant, office & corporate architecture, industry, education & public buildings or private living – MOLTO LUCE delivers solutions that impress through quality, functionality and design.

HIGHLIGHTS.

TARIO

A revolutionary lighting solution for retail and aisle zones: TARIO impresses with precise light control, multiple mounting options and efficient performance – perfect for showcasing products at any shelf height. Flexibly adjustable beam angles and the tool-free locking mechanism enable pinpoint light focus. With X-Change technology, LED and driver can be quickly adapted, simplifying both planning and maintenance. Offering up to 160 lm/W, excellent glare control (UGR <22), and versions for recessed mounting, 3-circuit or TRAIL track systems, TARIO delivers outstanding efficiency and seamless design integration.

Steinzentrale, Witten, DE

MOVA

Ten million possibilities, cutting-edge technology and clear design – our flexible spotlight platform sets new standards. The freely configurable spotlight combines variety, maximum flexibility and sustainability in a single luminaire head, enabling a resource-efficient lighting solution. Additional accessories enhance glare control and allow for customised light scenes in special applications. A standout feature: The available special light colours present products in an authentic light, enhance their visibility and create a unique shopping experience. Wherever natural colour rendering and emotional impact matter, MOVA is the perfect choice.

X-CHANGE

X-CHANGE 

ROGGA

Elegant spotlight series allowing tool-free replacement of driver, LED chip and optics. Comprehensive luminaire family with a consistent form factor (3-circuit, 2-circuit track, recessed, surface-mounted, suspended). Recessed versions feature an installation-friendly click system. Available in various tube lengths and finishes: black, white, grey, anodised, and powder-coated in Creative Colours.

TRAIL 2

TRAIL 2 stands for maximum efficiency, precise lighting technology, and a consistently refined system logic. With up to 222 lm/W, a new metric light inlay concept, and optimised installation, TRAIL 2 offers a powerful solution for industrial, logistics and commercial applications. High-quality optics ensure uniform, low-glare illumination, while the modular system allows flexible adaptation to a wide range of requirements. TRAIL 2 combines technical precision, easy installation and forward-thinking design in a single continuous-row lighting system.

SUBLINE

SUBLINE merges seamlessly with the architecture: fully integrated into the 3-circuit track, the luminaire itself disappears – only the light remains visible. As a fine, precise line of light, SUBLINE creates a natural lighting effect and a pleasant atmosphere with 3000 K and CRI 90. Whether with a microprismatic optic for soft, uniform illumination or a lens optic for targeted accents – SUBLINE brings light exactly where it is needed. Ideal for spaces where design and ambience go hand in hand.

SAVO

The SAVO recessed spotlight impresses with compact precision: its aluminium housing with vacuum-coated reflector ensures efficient light control and high light quality. The spotlight can be rotated 355° and tilted 70°, offers various output levels, and is available with different beam angles. With a CRI >90, SAVO delivers brilliant accent lighting for retail, hospitality, and corporate projects – flexible, powerful, and design-driven.

MOLTO COUSTIC®

Light and acoustics are far more than just functional elements of a space – they are essential to our well-being and perception. Only when combined in harmony do they unfold their full potential: Just as sun and moon work in unison to shape the rhythm of the day, a joint approach to lighting and acoustic planning creates a coherent spatial atmosphere – emotional, functional and aesthetic. With Molto Coustic, we bring both into perfect harmony.

Design: Ben Elmecker

LON

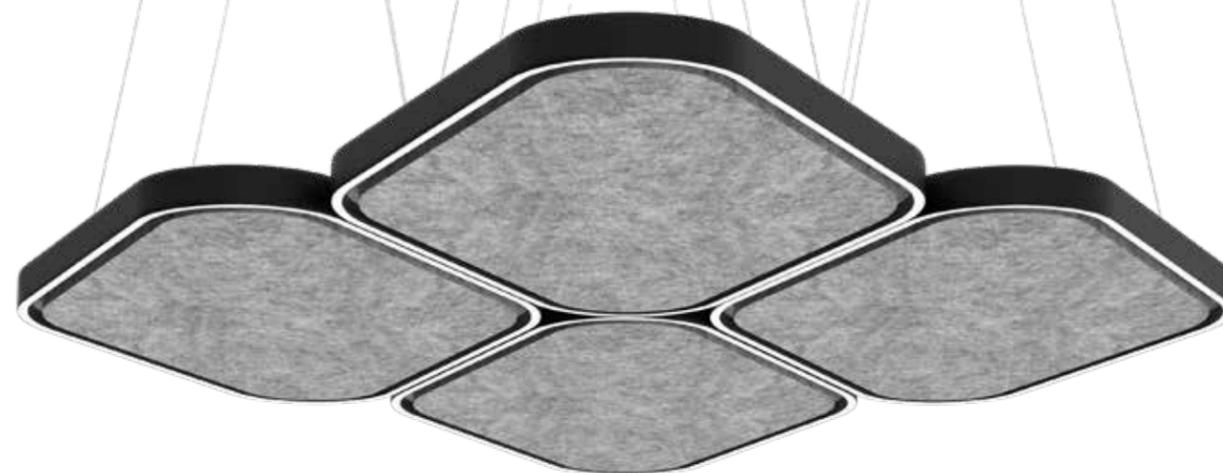

Ceiling and pendant light series, shapes: ring, hexagon, square, rectangle, or diamond made of aluminum, available in black, white, grey and Creative Colours. Equipped with a flexible opal diffuser and optional acoustic inserts. Available with 2700 K, 3000 K or 4000 K. Switchable, dimmable via DALI or Casambi.

Design Lon Hexagon: Ben Elmecker

reddot winner 2025

MAGNETICS

Black profile system, configurable with a wide range of lighting inserts. Profile available for recessed, surface-mounted, floor-standing and pendant luminaires.
