GOOD LIGHT STORIES

Light & Building 2026

MOLTO LUCE®

Our Expertise: Planning, development, implementation.

-  **In-house development & production in Austria:** Premium luminaires that impress with functionality, energy efficiency, durability, and design.
-  **Expertise & service:** Your requirements are implemented reliably and precisely – thanks to solution-oriented consulting and lighting design.
-  **Resource & cost efficiency:** Innovative solutions and efficient technologies enable significant savings in energy, costs, and CO₂e emissions.
-  **Tailored planning & flexibility:** Comprehensive support for architects, designers, and clients – from concept development to commissioning.

Under the motto “From our home to the world”, we are firmly committed to our location in Austria. From here, we realise impressive large-scale projects as well as refined, bespoke lighting and acoustic solutions.

Our dynamic development team and the continuously expanding production site in Weißkirchen near Wels ensure technological excellence, top product quality, and sophisticated design.

Combined with in-depth lighting and acoustic planning, this creates an unbeatable package of services – for new builds as well as refurbishments.

LIGHTS ON.

PEOPLE.

Around 470 employees at 10 locations in Austria, Germany, Switzerland and Italy are working to realise lighting solutions at an international level. We are an employer and training provider for a wide range of professions – from technicians and planners to sales specialists and back-office staff. Our strength lies in the knowledge and dedication of our employees. We are committed to securing and nurturing this expertise in the long term, which is why we invest specifically in training and development.

We are looking for individuals who are passionate about light, architecture and design, who are creative, reliable and committed, and who value respectful teamwork.

People. Power. Planet.

Sustainability means responsibility – towards people, the environment and the economy. With our People. Power. Planet. programme, we translate ESG principles into concrete goals and actions.

Three pillars for a shared future:

- People: fair working conditions, support for young talent, education and training
- Power: economic strength and innovative capability as the foundation of sustainable action
- Planet: conscious use of resources, resource-efficient production and energy-efficient products

These pillars are interlinked. Through continuous monitoring and our scorecard, we make progress measurable and document it transparently in our sustainability report.

WE CARE.

Technology in harmony with the environment.

Awards & Standards:

- EcoVadis Gold – among the top 5% of companies assessed worldwide
- Member of the UN Global Compact – commitment to international standards in environmental and corporate governance
- German Ecodesign Award – for the resource-saving X-Change technology

Innovative X-CHANGE technology
Converter, LED chip and optics can be replaced without tools – extending product lifetime and protecting the environment.

Our projects prove: successful lighting concepts know no boundaries. We think outside the box, we think in new ways – and we are fully committed to individuality rather than standard solutions. Only tailor-made concepts truly resonate with people on an emotional level while also meeting functional requirements. This is how light inspires – through emotion and efficiency – our customers, and ourselves.

PROJECTS.

Whether shop & retail, hotel & restaurant, office & corporate architecture, industry, education & public buildings or private living – MOLTO LUCE delivers solutions that impress through quality, functionality and design.

HIGHLIGHTS.

OTIN SOL

With an outstanding luminous efficacy of over 175 lm/W and a minimalist design, OTIN SOL sets new standards for high-performance downlights. The modular series integrates effortlessly into a wide range of ceiling types – ideal for both new constructions and renovations. Multiple sizes, covers and optics ensure maximum flexibility across various applications, from offices to hospitality. OTIN SOL – the elegant surface-mounted version designed especially for high ceilings and exposed concrete. It not only makes a bold visual statement but also introduces indirect lighting as a new feature. Additionally, OTIN SOL is now available as a pendant version, offering refined accent lighting for contemporary spaces with architectural sophistication.

X-CHANGE

TWINS

With its innovative twin-housing concept, TWINS delivers efficiency-driven, intelligent lighting solutions for production and logistics environments. At its core is the unique, glare-free twin-lens system, combining two different light distributions and materials (PC & PMMA) – for precise, high-quality illumination.

With a system efficacy of 186 to 203 lm/W, TWINS sets new standards in energy efficiency. Integrated Bluetooth mesh sensor technology makes TWINS ready for connected, smart lighting solutions of the next generation.

TRAIL 2

TRAIL 2 stands for maximum efficiency, seamless light quality and a consistently refined system logic. With up to 217 lm/W, light inserts from 1 m to 2.5 m and a continuous lens concept without visible transitions, the trunking system offers a powerful solution for industrial, logistics and commercial applications.

The optimised quick-lock mechanism ensures particularly easy and fast installation. High-quality optics provide homogeneous, low-glare illumination, while the modular system allows flexible adaptation to a wide range of requirements. TRAIL2 combines efficiency, technical precision and forward-looking design in a high-performance continuous-row lighting system.

Edge-to-edge mounting of light inserts for continuous light lines

2 LINE

2 LINE offers maximum design freedom: available as a single luminaire or continuous lighting system, it enables seamless light guidance across architectural boundaries. Its standout feature: illuminated inner and outer corner connectors that create uninterrupted light transitions – ideal for creative spatial concepts with a strong architectural focus. Whether equipped with linear light, integrated spotlight inserts, or configured as a flexible system – 2 LINE balances functionality and design with precision. Available in white, black or silver, dimmable via switch, DALI or Casambi, and offering 2700 to 4000 K with CRI > 80 – it adapts effortlessly to any project and atmosphere.

BINA RECTANGULAR

BINA is a versatile luminaire family featuring clean geometry, a slim design, and uniform light distribution. Thanks to a variety of shapes and configuration options, BINA can be seamlessly integrated into a wide range of architectural and lighting concepts.

With the new Rectangular version, BINA expands its formal spectrum to include a linear solution – ideal for structured spatial concepts and project-oriented applications.

SYSTEM

SYSTEM combines efficiency, ergonomics and contemporary design: with up to 170 lm/W, high uniformity and low luminance, it ensures optimal lighting conditions at the workstation.

Available in four versions – On/Off, Push Dimm, Motion Swarm and Motion Daylight – SYSTEM adapts flexibly to individual working environments. The control display allows users to adjust the illuminance levels in accordance with EN12464-1, tailored to specific workplace needs.

The innovative sensor matrix divides workstations into five zones, with lighting automatically adjusted according to the level of daylight – ensuring consistent illumination with minimal energy consumption.

LENS 2

Luminaire series for single, double, triple and quadruple workstations. Energy consumption is optimised via individual workstation control with daylight and motion detection. Perfect glare control with UGR < 16. Illuminance adjustable according to EN 12464-1. Faceted high-gloss louvers, specially developed optics, and a full-coverage sensor matrix ensure optimal energy efficiency.

MAGNETICS

Black profile system, configurable with a wide range of lighting inserts. Profile available for recessed, surface-mounted, floor-standing and pendant luminaires.

DESIGN PLUS
powered by: **light+building**

X-CHANGE

ROGGA

Elegant spotlight series allowing tool-free replacement of driver, LED chip and optics. Comprehensive luminaire family with a consistent form factor (3-circuit, 2-circuit track, recessed, surface-mounted, suspended). Recessed versions feature an installation-friendly click system. Available in various tube lengths and finishes: black, white, grey, anodised, and powder-coated in Creative Colours.

LUMERO+

LUMERO+ is a modular lighting system for ceilings and walls that merges maximum design freedom with technical innovation. Available as surface-mounted, recessed or pendant version, it allows flexible combinations of spotlights and pendants for seamless integration into any interior concept. Ideal for architects and planners seeking design variety, smart control and precision lighting in one system.

MOLTO COUSTIC®

Light and acoustics are far more than just functional elements of a space – they are essential to our well-being and perception. Only when combined in harmony do they unfold their full potential: Just as sun and moon work in unison to shape the rhythm of the day, a joint approach to lighting and acoustic planning creates a coherent spatial atmosphere – emotional, functional and aesthetic. With Molto Coustic, we bring both into perfect harmony.

LON

Pendant light series, shapes: ring, hexagon, square, rectangle, or diamond made of aluminum, available in black, white, grey and Creative Colours. Equipped with a flexible opal diffuser and optional acoustic inserts. Available with 2700 K, 3000 K or 4000 K. Switchable, dimmable via DALI or Casambi.

reddot winner 2025

FLOYD

FLOYD is a minimalist office luminaire that combines clear design language with flexible functionality. Its reduced aesthetic integrates seamlessly into any workspace, becoming an elegant light source with character. With intuitive touch control and adjustable colour temperature, FLOYD ensures the perfect lighting mood at all times – whether focused or atmospheric.

CIRC

CIRC is a bollard luminaire made of durable die-cast aluminium, bringing timeless aesthetics to modern outdoor spaces with its clear, geometric design – perfect for pathways, walkways or residential areas. Its standout feature: a specially developed optical lens that guides the light with high efficiency and minimal glare, directing it precisely where needed while reducing unwanted light spill.

ATO

ATO is a durable bollard luminaire made of powder-coated aluminium. Its asymmetrical lens provides broad, uniform illumination up to 9 metres, with no upward light emission. Switchable and IP65-rated, ATO delivers targeted, low-pollution lighting for paths, driveways and outdoor spaces.
