MOLTO LUCE®

GOOD LIGHT STORIES

When the light comes on, the difference is immediately noticeable. Because good light is much more than brightness – it creates atmosphere, guides the eye, provides orientation, supports a wide range of activities, and enhances well-being. Only this understanding allows for the harmonious interplay of architecture, interior design, and light – three elements that work in unison to perfect a space.

In lighting, it's not the quantity that matters, but the right balance. Modern technologies and carefully planned lighting transform the basic function of light into a holistic spatial experience with maximum functionality.

Development and production – Weißkirchen, Austria

Our Expertise: Planning, development, implementation.

-  **In-house development & production in Austria:** Premium luminaires that impress with functionality, energy efficiency, durability, and design.
-  **Expertise & service:** Your requirements are implemented reliably and precisely – thanks to solution-oriented consulting and lighting design.
-  **Resource & cost efficiency:** Innovative solutions and efficient technologies enable significant savings in energy, costs, and CO₂e emissions.
-  **Tailored planning & flexibility:** Comprehensive support for architects, designers, and clients – from concept development to commissioning.

Under the motto "From our home to the world", we are firmly committed to our location in Austria. From here, we realise impressive large-scale projects as well as refined, bespoke lighting and acoustic solutions.

Our dynamic development team and the continuously expanding production site in Weißkirchen near Wels ensure technological excellence, top product quality, and sophisticated design.

Combined with in-depth lighting and acoustic planning, this creates an unbeatable package of services – for new builds as well as refurbishments.

LIGHTS ON.

PEOPLE.

Around 470 employees at 10 locations in Austria, Germany, Switzerland and Italy are working to realise lighting solutions at an international level. We are an employer and training provider for a wide range of professions – from technicians and planners to sales specialists and back-office staff. Our strength lies in the knowledge and dedication of our employees. We are committed to securing and nurturing this expertise in the long term, which is why we invest specifically in training and development.

We are looking for individuals who are passionate about light, architecture and design, who are creative, reliable and committed, and who value respectful teamwork.

People. Power. Planet.

Sustainability means responsibility – towards people, the environment and the economy. With our People. Power. Planet. programme, we translate ESG principles into concrete goals and actions.

Three pillars for a shared future:

- People: fair working conditions, support for young talent, education and training
- Power: economic strength and innovative capability as the foundation of sustainable action
- Planet: conscious use of resources, resource-efficient production and energy-efficient products

These pillars are interlinked. Through continuous monitoring and our scorecard, we make progress measurable and document it transparently in our sustainability report.

WE CARE.

Technology in harmony with the environment.

Awards & Standards:

- EcoVadis Gold – among the top 5% of companies assessed worldwide
- Member of the UN Global Compact – commitment to international standards in environmental and corporate governance
- German Ecodesign Award – for the resource-saving X-Change technology

Innovative X-CHANGE technology Converter, LED chip and optics can be replaced without tools – extending product lifetime and protecting the environment.

Our projects prove: successful lighting concepts know no boundaries. We think outside the box, we think in new ways – and we are fully committed to individuality rather than standard solutions. Only tailor-made concepts truly resonate with people on an emotional level while also meeting functional requirements. This is how light inspires – through emotion and efficiency – our customers, and ourselves.

PROJECTS.

Whether shop & retail, hotel & restaurant, office & corporate architecture, industry, education & public buildings or private living – MOLTO LUCE delivers solutions that impress through quality, functionality and design.

HIGHLIGHTS.

OTIN

Downlight series with very high efficiency (>170 lm/W), modular design in various sizes, round or square, designed for installation in a wide range of cut-outs. Faceted reflector available in high-gloss, dark chrome or matt white. Cover ring in black or matt white. Version with integrated motion sensor available. Tool-free replacement of the LED board.

X-CHANGE 

LOG 50

Profile luminaire series made of aluminium, powder-coated surface in white, black, grey or Creative Colours. Available as surface-mounted, recessed or pendant version, in linear or round designs. Available as single luminaires or system variants.

X-CHANGE 

MOVA

Ten million possibilities, cutting-edge technology and clean design – our flexible spotlight platform sets new standards. The freely configurable spotlight offers a wide range of variants, maximum flexibility and outstanding sustainability – all from a single spotlight head. This enables a resource-efficient lighting solution. Additional accessories optimise glare control and enable tailored lighting scenarios for special applications.

Einhell, Landau an der Isar, Germany

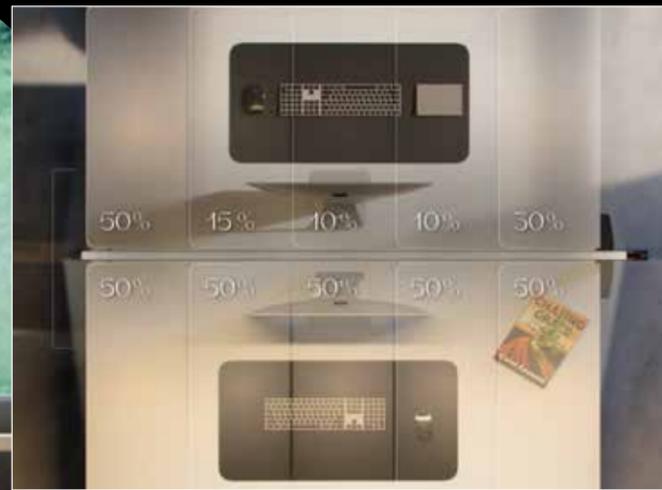

LENS 2

Luminaire series for single, double, triple and quadruple workstations. Energy consumption is optimised via individual workstation control with daylight and motion detection. Perfect glare control with UGR < 16. Illuminance adjustable according to EN 12464-1. Faceted high-gloss louvers, specially developed optics, and a full-coverage sensor matrix ensure optimal energy efficiency.

The innovative sensor matrix divides workstations into five zones, with lighting automatically adjusted according to the level of daylight – ensuring consistent illumination with minimal energy consumption.

X-CHANGE

ROGGA

Elegant spotlight series with tool-free replacement of converter, LED chip and optics. Comprehensive luminaire family with a consistent form factor (3-circuit, 2-circuit and 24V track, recessed, surface-mounted, pendant). Recessed versions feature an installation-friendly click system. Available in various tube lengths, powder-coated in black, white, grey and Creative Colours.

PERFORA PRO

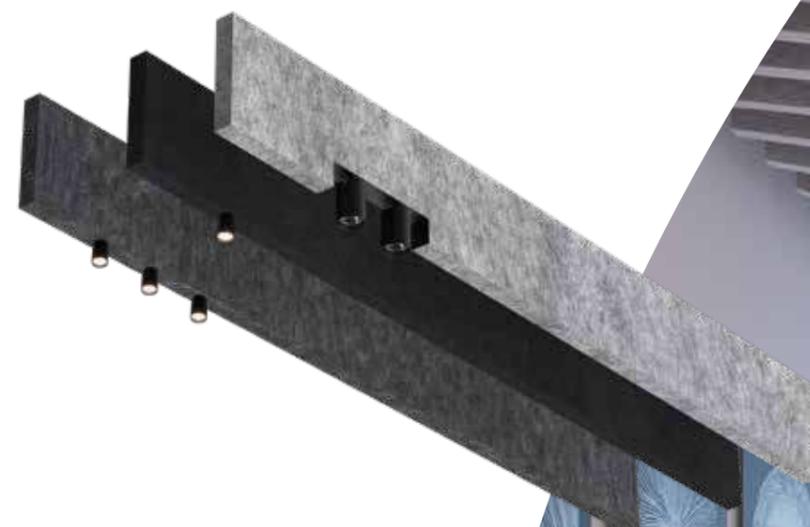

Available as a direct and indirect lighting version, PERFORA PRO combines functionality and design like no other. With low glare and pleasant colour temperatures of 2700 K or 3000 K, it creates a subtle yet impactful lighting experience. The luminaire is controllable via DALI-2 and PUSH DIM.

MOLTO COUSTIC®

Light and acoustics are far more than just functional elements of a space – they are essential to our well-being and perception. Only when combined in harmony do they unfold their full potential: Just as sun and moon work in unison to shape the rhythm of the day, a joint approach to lighting and acoustic planning creates a coherent spatial atmosphere – emotional, functional and aesthetic. With Molto Coustic, we bring both into perfect harmony.

LON

Ceiling and pendant luminaire series in ring or hexagon shape, made of aluminium, available in black, white, grey and Creative Colours. Equipped with a flexible opal diffuser and optional acoustic inserts. Available with 2700 K, 3000 K or 4000 K. Switchable, dimmable via DALI or Casambi. Design Lon Hexagon: Ben Elmecker

reddot winner 2025

MAGNETICS

Black profile system, configurable with a wide range of lighting inserts. Profile available for recessed, surface-mounted, floor-standing and pendant luminaires.
